5. If you are to start a software company, name 2 people from your batch whom you will choose as your partner and why?

I would like to choose Swaroop and Abhishek as my team key players. They are my best partners and we done some projects together during our academic time together. I was given a chance of team leader to understand the real life situations and to make a good decision out of many queries.

I think we have the best team coordination and we have knowledge to back up each other if required. We can solve problem consistently and in a systematic manner.They will help me to understand any type solutions. If I start a software company I will choose Swaroop and Abhishek as my partner.
